2.	AH:	Um, so, but even with the withdrawal times, that's what I was worried about because I give him that stuff six days out.
3.	SF:	No, because like I said, I put the withdrawal there because I got guys in Hong Kong and stuff like that, and they can test for fragments. They can't do it in the US, and like I said, to be super safe, I put it on there anyway because if a bottle gets, like, turned in then at least when they see "Use 6 Days Out" they don't think it is a pre-race as well. So, when jurisdiction finds something and they see "Use 6 Days Out" then it is almost like they don't pay too much attention to it because it is like it's a disclaimer that it is not a pre-race, right?
4.	AH:	Right, um, all I gave him on race day was that VO2...
5.	SF:	Alright, well, obviously he is feeling good then, hopefully he - at least, you know... So, you are going to race him, what, another four times? That's it?
6.	AH:	Um, it'll be, back in on Sunday and then he will race three or four times in April, so he probably has about five or six more races.
7.	SF:	Alright, so then we will figure out, like, when you hit him again, because I would only do it, like, every two weeks at the most. You know?
